Agronomist Comments

Wet May and June, combined with conservative N program resulted in N deficiency
 Heavy Tar Spot in both plots, visually was earlier in No Fungicide plot
 Fungicides are showing no response here and several other situations in DK Co.
 Fungicides showing replicated results over 40 bu/a within 10 miles of plot
 Clearly there is more to be learned about timing of fungicides for tar spot
 Some root feeding observed, overall light
 Crown Rot was also heavy throughout the plot
